Annexure 1 – Response to Technical Queries

SL. NO.	BIDDER NAME	QUERY SUBMITTED VIA	BIDDING DOCUMENT		SUBJECT	BIDDER'S QUERY	OWNER'S REPLY
			PAGE NO.	CLAUSE NO.			
1	Govardhan & Company	Email			SOR	What would be the weight of each Gate panel. We shall have to consider a factor of safety of 2.	Each gate leaf would be approx. 325 kgs in weight. Factor of safety may be considered as per norms.
2	Govardhan & Company	Email			SOR	What would be the cycles of operation for Gate. Swing gate motors if continuously used for 3 - 4 cycles of operation will heat up and stop functioning. Once the motor cools down, then they work again.	The gates will be operated twice in a day normally (once for opening & once for closing). There may be additional operations required during emergency incidents.
3	Govardhan & Company	Email			SOR	Gate leaf width is mentioned as 2.1 Mtr wide and height as 4.5 Mtr. I believe it is the other way round. I.e 4.5 Mtr Wide x 2.10 Mtr Height.	Yes, the gate size is 4.5 m (Width) and 2.1 m (Height)
4	Govardhan & Company	Email			SOR	In Swing gate motors when they mention up to 5 mtr leaf length and up to 500 kg, there is a graph where in it indicates if the Gate leaf is 5 mtr wide What would be the maximum weight of the Gate. Also, if the Gate weight is 500 kg, What would be the maximum leaf length. It is not both 5 mtr leaf length and 500 kg leaf weight together.	The specifications are for gate automation and mention motor capacity of "upto" 500 kgs. The gate design will be shared with successful bidder.
5	Govardhan & Company	Email			SOR	It would be ideal to fabricate Gate using GI Tubes to reduce weight of Gate as well as to counter corrosion.	The gate design will be shared with successful bidder. The gate design considers GI tubes.
6	Govardhan & Company	Email			SOR	Further regarding items no 247,248,249and 261,262,263 looks Similar not able to find out difference	Item No. 247, 248 & 249 relate to Supply. Item No. 261, 262 and 263 relate to Installation, Testing &
